DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 18-36, 45-81, and 91-93, are drawn to a coil or coil array for use with magnetic resonance imaging, classified in class 324, subclass 318.
 - II. Claims 37-44, and 82-90, are drawn to designing a coil capable of exhibiting a homogeneous magnetic field, classified in class 335, subclass 299.
2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed can be used to make other and materially different coil to be used as transmitter and/or in a radar and/or radio systems.
3. If applicant elects Group I, the following patentably distinct species deemed proper.
4. This application contains claims directed to the following patentably distinct species of the claimed invention:
 1. Claims 18-36, 46-60, 62-76, 77-81.
 2. Claims 45, 91-93.

3. Claim 61.

5. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim(s) deemed generic.

6. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

7. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

8. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

9. A telephone call was made to attorney James Stevenson to request an oral election to the above restriction requirement, but did not result in an election.
